PROFESSIONAL SUMMARY

Backend Developer with hands-on experience in developing RESTful APIs, working with relational databases, and building enterprise web applications in Agile environments. Experienced with Java, Spring Boot, and Drupal custom module development, with a solid foundation in OOP, client-server architecture, API integration, and database design. Familiar with C# and interested in developing backend applications with the .NET ecosystem. Strong ability to transfer backend development knowledge from Java/Spring Boot to C#/.NET and eager to learn and contribute to professional software projects.

EDUCATION

Vietnam – Korea University of Information and Communication Technology (VKU)

Da Nang, Vietnam

Bachelor of Computer Science, Concentration in Software Engineering

Graduated: May 2026 – **Very Good**

GPA: 3.3 / 4.0

TECHNICAL SKILLS

- Programming Languages: Java, C#, TypeScript, SQL.
- Backend & Frameworks: Spring Framework, ASP.NET Core, Entity Framework Core, Drupal CMS.
- Frontend: React, TypeScript.
- Databases: MySQL, MongoDB.
- Tools & Technologies: Git, Docker, Maven, Postman, Linux (Ubuntu).
- Languages: Vietnamese (Native), English (Intermediate).

WORK EXPERIENCE

Kyanon Digital | Danang, Viet Nam

CMS Developer Trainee

Apr 2026 – Jul 2026

Project: Enterprise Loyalty & Rewards Platform for Banking Industry

- Participated in developing and maintaining backend features for **Budget Management, Rewards, Voucher, and Approval Workflow** modules within an enterprise CMS platform using **Drupal custom modules**.
- Developed and enhanced **10+ RESTful APIs** for internal administration systems and frontend applications, following enterprise backend development practices commonly used in **Java Spring Boot** applications.
- Worked with **MySQL databases**, including writing SQL queries and implementing data retrieval and processing logic for business requirements.
- Contributed to a hybrid architecture combining Drupal CMS services with Java Spring Boot worker components for enterprise business processing and asynchronous workflows.
- Participated in frontend development tasks using **React** and **TypeScript** for internal management interfaces.
- Collaborated with backend developers, frontend developers, QA engineers, business analysts, and designers in a **16-member Agile/Scrum** team.
- Participated in daily **stand-up meetings, sprint planning, and code review** activities while working closely with a mentor serving as the project's **Tech Lead**.
- Utilized **Git** for version control and **Docker** for local development, testing, and deployment environments.

FPT Software Danang | Danang, Viet Nam

Java Developer OJT

Jan 2025 – Apr 2025

Project: Internal Enterprise Operations & Resource Management System

- Participated in developing and maintaining 5+ backend features and API endpoints using **Java** and **Spring Boot**.
- Supported the development and integration of RESTful APIs between internal modules and external services.
- Worked with **MySQL** databases, writing SQL queries and supporting business data processing requirements.
- Assisted in researching and implementing solutions for asynchronous processing and system integration tasks.
- Collaborated with a **5-member Agile** team including Product Owners, QA engineers, UI/UX designers, and developers.
